# Digital divide

- Inequalities in access (first level digital divide)
- Inequalities in digital usage and skills (second level digital divide)
- Benefits and opportunities based on access and use (third level digital divide)
- All three intertwined with social inequalities. The uneven distribution of resources and capitals (economic, social and cultural capital) among the population as the basis of digital inequalities.

# Ecosystem influences on **The Digital Generation**

Relationships and interaction with and between a child's family, education, leisure time and civic participation influence their development
